### ***Claim Objections***

Claims 32-33, 35, 41-42, 44 are objected to because of the following informalities: taking claim 32 as exemplary, there is a lack of proper antecedent basis for "selecting a route for each net" [line 1], considering that the scope of claim 27 provides for "selecting routes for nets" [line 9, emphasis added]. Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 27-32, 36-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 17, 33, 48 of U.S. Patent No. 6,651,233. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is essentially claiming the same subject matter.

Claims 27-44 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 27-46 of

Art Unit: 2825

copending Application No. 10/047,978 and over claims 27-38 of copending Application No. 10/046,864. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is essentially claiming the same subject matter.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 27-32, 36-41 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Agrawal et al. [U.S. Patent #5,218,551].

Claims 27-32, 36-41 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Wang [U.S. Patent #5,784,289].

### ***Allowable Subject Matter***

Claims 33-35, 42-44 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2825

The following is a statement of reasons for the indication of allowable subject matter: taking claim 33 as exemplary, the prior art of record does not disclose or teach c) selecting routes for nets based on the computer edge-intersect costs comprises a) using the potential routes and the edge-intersect costs to formulate a LP problem and b) solving the LP problem to identify one route for each net, in combination with all of the features recited in claim 27 in total.
